**FOREIGN DIRECT INVESTMENT
IN THE UNITED STATES**

1992 Transactions

**U.S. DEPARTMENT OF COMMERCE
International Trade Administration
Office of Trade and Economic Analysis**

AUGUST 1993

FOREWORD

This report covering 1992 is one of an annual series of publications on foreign direct investment transactions in the United States. The reports have been prepared by the Office of Trade and Economic Analysis and its predecessor units, the Office of Trade and Investment Analysis, the Office of International Investment, and the Office of Foreign Investment in the United States.

Listings of individual foreign direct investment transactions in the United States are especially useful to government and private sector analysts needing information on the investment activities of prominent foreign firms and individuals in the United States. This publication incorporates information from a wide variety of public sources; efforts were made to verify the timing and terms of all completed transactions.

The transactions listings are arranged by the primary Standard Industrial Classification (SIC) of the U.S. company owned/controlled by foreign investors (Appendix A), by the source country of the foreign investors (Appendix B), and by the U.S. state location of the foreign investment (Appendix C).

INTRODUCTION

The purpose of this report is to identify specific foreign direct investment (FDI) transactions in the United States during 1992, to analyze recent trends in such investment, and to provide data and related information on significant transactions. The report incorporates information obtained in fulfilling responsibilities assigned to the Secretary of Commerce by Executive Order No. 11858, dated May 7, 1975. Specifically, the Secretary of Commerce is responsible for "the obtainment, consolidation, and analysis of information on foreign direct investment in the United States."

Foreign direct investment, as used in this report, means the direct or indirect ownership of 10 percent or more of the voting securities of an incorporated business enterprise, or an equivalent interest in an unincorporated business enterprise, or a 10 percent or more interest in real property transactions.

Transaction values, as used in this report, refer to the reported total cost of the investment regardless of the source or timing of funds. In the case of a joint venture, the estimated foreign ownership proportion of the investment is cited. These values are intended to identify the relative size of various investments and, in the aggregate, to indicate trends in investment activity.

The data and other information contained in this report represent a compilation and distillation of material from generally available public sources, transaction participants, and miscellaneous contacts. A major portion of the data and information was derived from secondary public sources such as newspapers, magazines, and business and trade journals, as well as from the public files of Federal regulatory agencies. In all instances, the monetary values of investments in this report include only those identified in these sources and should not be considered a compilation of the entire universe of FDI transactions.

The primary Federal agency sources for publicly available data are the Securities and Exchange Commission (SEC), the Federal Trade Commission (FTC), and the Federal Reserve Board (FRB). Much of the data obtained from Federal regulatory agencies originated from report series that differ widely in frequency and content. These reports are, in most cases, filed in response to the various agencies' general regulatory responsibilities, rather than for the specific purpose of providing data on foreign investment. Certain other investment transactions and related data collected by the Federal

Government on a business confidential basis to facilitate Federal regulatory responsibilities or to provide aggregate data for macroeconomic analysis purposes are not available for this report.

It should be noted that the aggregate data in this report are not strictly comparable to the other major statistical series on foreign direct investment in the United States, published by the Commerce Department's Bureau of Economic Analysis (BEA). The BEA aggregate dollar value data on new investments, published annually since 1979, are based on individual firm responses to mandatory reporting requirements (including strict confidentiality provisions protecting the identity of individual reporting firms). The BEA data are thus likely to provide more comprehensive coverage for the types of transactions included in BEA's reporting requirements.

The information contained in this report not only identifies individual transactions, but includes a broader range of investment transactions than the BEA data--particularly with regard to plant expansions, equity increases, and certain types of real estate investments. Although the two data series are not directly comparable, there has been significant correlation in the movement of the overall series in most years.

While every effort was made to verify the information obtained from public sources, the U.S. Department of Commerce is not responsible for any inaccuracies or gaps in information presented in this report. Transaction values for many investments are not publicly available. Nevertheless, experience has shown that value and other data for the large majority of major investments are identified in the monitoring process.

OVERVIEW OF FOREIGN INVESTMENT IN THE UNITED STATES--1992

The Office of Trade and Economic Analysis (OTEA) identified from public sources 512 foreign direct investment transactions that were completed during 1992. Values were reported for 217 of these individual transactions, amounting to a total of \$14.9 billion. Appendices A, B, and C contain listings of all the identified transactions by U.S. industry, source country, and state location.

The total number of transactions decreased by 29 percent from the 725 reported for 1991 (Figure 1). In value terms, the 1992 total reflected a decrease of 33 percent from the total value of \$22.3 billion that was identified in 1991.

Figure 1

TOTAL NUMBER OF FOREIGN DIRECT INVESTMENTS

Japan was the source country for the largest number of transactions, as it has been for the past eight years. A total of 195 transactions originated in Japan, with 89 reported values totaling \$2.7 billion. Germany was second with 58 transactions and 20 reported values totaling \$2.9 billion. The United Kingdom accounted for 52 transactions with 23 reported values of \$.9 billion.

Major industrialized countries were again the source of most direct investment activity in the United States in 1992 as seven nations – Japan, the United Kingdom, Germany, Canada, France, the Netherlands, and Switzerland – accounted for 76 percent of the total number of transactions, representing 79 percent of the total identified value. There were investments from 42 source countries in 1992, as compared with 43 source countries in 1991.

There were fewer large transactions in 1992 than in previous years, but they again accounted for a substantial part of the total value. In 1992, the 10 largest transactions had a combined value of \$7.7 billion, 52 percent of the total value. There were only three transactions of \$500 million or more in 1992 as compared with 10 such transactions in 1991 and 23 in 1990.

The manufacturing sector, as in past years, continued to be the dominant recipient of foreign direct investment transactions and aggregate values. In 1992, the manufacturing sector accounted for 236 transactions with 122 identified values totaling \$8.3 billion. The services sector was the second most attractive area to foreign investors; there were 68 transactions with 32 identified values that totaled \$1.1 billion. Transportation, Communications, and Utilities recorded 56 transactions, with 10 reported values totaling \$.6 billion.

In 1992, acquisitions/mergers, new plant activity, and joint ventures were the leading forms of investment activity in terms of the number of transactions. Of a total of 512 transactions, acquisitions/mergers accounted for 186 of the transactions identified, new plant activity for 53, and joint ventures for 50.

Foreign direct investments were identified in 46 states, the District of Columbia, and Puerto Rico during 1992. California and New York, as in the previous eight years, remained the two most popular states for investment with 92 and 62 transactions, respectively. Florida was third with 39 transactions. By transaction values identified, the state of California was the leading recipient with \$6.1 billion, followed by New York with \$1 billion and South Carolina, Florida, and Texas with \$.9 billion each.

INVESTMENT BY SOURCE COUNTRY

The major industrialized countries have traditionally been the source of most direct investment activity in the United States. This trend continued in 1992 as seven nations – Japan, the United Kingdom, Germany, Canada, France, the Netherlands, and Switzerland – accounted for 388 transactions or 76 percent of the total transactions, a slight decline from the 80 percent share these countries had in 1991. The identified aggregate value of the transactions by the seven countries – \$11.7 billion – represented 79 percent of the total identified value, as compared with 82 percent in 1991. The aggregate value was 36 percent less than the reported value of \$18.2 billion in 1991, which was a 65 percent drop from the 1990 reported value of \$51.4 billion.

As in the last eight years, Japan was the source country for the largest number of transactions. More than 38 percent, or 195 transactions, originated from Japan in 1992, with 89 identified values totaling \$2.7 billion. Germany was second with 58 transactions and 20 identified values totaling \$2.9 billion. The United Kingdom was third in number of transactions with 52 and 23 identified values of \$0.9 billion. (Figure 2 shows the number of investments by the top seven source countries.)

Table I shows the number of completed transactions with identified values by country for 1992, while Table II shows the continuing dominance of the principal source countries (also the United States' largest trading partners) as sources of foreign direct investment in the United States.

THE MEGADEALS

In 1992, for the third consecutive year, the Office of Trade and Economic Analysis identified a decline in the number of megadeals. Megadeals are defined as foreign direct investment transactions with a value of \$100 million or more. In 1992, there were 29 megadeal transactions with a total value of \$10.7 billion (Table III) compared to 48 megadeals with a total value of \$16.4 billion identified in 1991 and 105 megadeals with a total value of \$48.4 billion identified in 1990.

There were two transactions in 1992 that had individual values of more than \$1 billion, compared with four such transactions in 1991. In the largest transaction of 1992, Altus Finance of France acquired Executive Life Insurance Company for \$3.6 billion.

The remaining top 10 transactions were five acquisitions/mergers, one equity increases, one joint venture, and one new plant: the equity increase of \$1 billion in IBM's Rolm Systems Division by Siemens AG of Germany; the acquisition of Tenneco Minerals Company for \$500 million by Solvay SA of Belgium; the acquisition of the Coty Fragrance and Cosmetic Division of Pfizer for \$440 million by Joh. A. Benckiser GmbH, controlled by the Reimann family of Germany; a new BMW of North America plant for \$400 million by Bayerische Motoren Werke AG, controlled by the Quandt family of Germany; the acquisition of Systemix, Inc. for \$392 million by Sandoz Ltd. of Switzerland; the joint venture in Auto Alliance International, Inc. for \$380 million by Mazda Motor Corporation of Japan; the \$353 million plant expansion of Formosa Plastics Corporation USA by Formosa Plastics Group, controlled by Y.C. Yang of Taiwan; the acquisition of FLS Holdings, Inc. for \$350 million by Kyoei Steel Ltd of Japan; and the acquisition of Mobil Chemical Company's polystyrene resin business by BASF AG of Germany.

In 1992, there was not the domination of megadeals by a few countries that has been evident in past years. German investors concluded seven megadeals; Japanese investors had five; Swiss investors had three; while Mexican Taiwanese, and United Kingdom investors had two each. Investors from eight other countries concluded one megadeal each.

Acquisitions/mergers again accounted for the predominant number of megadeals, 15 transactions, accounting for 52 percent of the megadeal transactions. In addition, there were five new plants, three equity increases,

three plant expansions, one joint venture, and two transactions in the other category.

In 1992, five megadeal transactions occurred in the state of California, followed by Florida, New York, South Carolina and Texas with three each. Michigan and North Carolina each recorded two. Eight states recorded one megadeal each.

INVESTMENT BY INDUSTRY

The manufacturing sector, as in past years, continued to be the dominant recipient of foreign direct investment transactions and aggregate values. In 1992, the manufacturing sector accounted for 236 transactions with 122 identified values totaling \$8.3 billion. Within manufacturing, the chemicals subsector had the most investments, followed closely by machinery, except electrical, and electronic and electric equipment.

The services sector was the second most attractive area to foreign investors; there were 68 transactions with 32 identified values that totaled \$1.1 billion. Transportation, communications, and utilities recorded 563 transactions with 10 available values totaling \$.6 billion.

Figure 3 shows the principal industry sectors by numbers of transactions.

Table IV shows the investment activity in each Standard Industrial Classification (SIC) sector.

Table V highlights the trend in completed cases by principal source country in each SIC sector for the year.

MODE OF INVESTMENT TRANSACTIONS

Foreign direct investment transactions can be classified into various modes relating to type and characteristics. For the purpose of the OTEA transaction monitoring program, the modes of investment used are the following:

- Acquisitions/mergers
- Equity increases
- Joint ventures
- New plants
- Plant expansions
- All others

Appendix D defines these and other terms used in this report.

In 1992, acquisitions/mergers, new plant activity, and joint ventures were the leading forms of investment activity in terms of the number of transactions. Acquisitions/mergers accounted for 186 of the transactions identified, new plant activity for 53 transactions, and joint ventures for 50 transactions. Together these three modes accounted for 289 transactions, 56 percent of the total investment transactions identified.

Table VI shows the modes of investment by principal source country.

LOCATION OF INVESTMENT BY STATE

Foreign direct investments were identified in 46 states, the District of Columbia, and Puerto Rico during 1992 (Table VII). California and New York, the leading states for the previous eight years, remained in this position with 92 and 62 transactions, respectively. Other states that had substantial investment were Florida (39 transactions), Texas (36), North Carolina (21), New Jersey (20), Ohio (19), and Michigan (17). As occurred in 1991, the eight states with the most transactions accounted for 60 percent of all investment transactions identified in 1992 (Figure 4).

Figure 4

NUMBER OF INVESTMENTS BY STATE 1992

Six of the eight states with the most transactions also led based on transaction values. According to the transaction values identified, California was the leading recipient with \$6.1 billion, followed by New York (\$1 billion), South Carolina, Florida, and Texas (\$0.9 billion each), Michigan (\$0.7 billion), Colorado (\$0.6 billion), and New Jersey (\$0.5 billion).

MAJOR SECTORAL DEVELOPMENTS

This section focuses on major investment transactions trends in those sectors where foreign direct investment was concentrated or where a particular investment pattern or a noteworthy transaction occurred.

In 1992, there was notable foreign direct investment activity in 10 industrial sectors. Only three sectors recorded more than \$1 billion worth of foreign direct investment transactions in 1992, as compared with six sectors in 1991 and 13 sectors in 1990.

Printing and Publishing (SIC 27) -- The number of foreign direct investment transactions in the printing and publishing industry continued to decline in 1992, down almost 23 percent from the previous year. The total transaction value rose by more than 64 percent over that of the previous year, however. Seventeen printing and publishing transactions were identified; five of them had a total value of \$374.5 million, as compared with 1991 when 22 transactions with eight identified values totaled \$228.2 million.

Japan, with four investment transactions, was the primary source country for investors in this industry, replacing the United Kingdom, which had been the leading investor for five consecutive years. The United Kingdom and Canada tied for second place with three investment transactions apiece, while Germany was third with two transactions. The two largest investments in this industry accounted for almost 82 percent of the total dollar value. The largest transaction was an equity increase valued at \$175 million. Philips Gloeilampenfabriken NV of the Netherlands acquired 25 percent of Whittle Communications LP, a Knoxville, Tennessee publisher and communications firm, raising the foreign ownership to 49.6 percent from 33 percent.

The second largest transaction was the \$130 million acquisition of the periodicals publishing subsidiaries of American Publishing Group Inc., a Miami-based publisher of Spanish-language magazines, by Mexico's Grupo Televisa SA de CV. In 1992, Televisa was also part of a group of investors that acquired Univision Holdings Inc.'s Spanish-language network from Hallmark Cards Inc. for \$550 million. Grupo Televisa is controlled by the Emilio Azcarraga family.

The periodicals publishing subsector (SIC 2721), with 11 transactions, attracted almost two-thirds of the foreign investment in the publishing and printing industry. Newspaper publishing (SIC 2711) and book publishing (SIC

2731) were less active with two transactions each. As in 1991, New York, California, and Washington, D.C. were the primary locations for foreign investments, accounting for seven, three, and two transactions, respectively.

Chemicals and Allied Products (SIC 28) -- Foreign direct investment in the chemicals and allied products sector accounted for more than 21 percent of the total foreign direct investment value in 1992. Forty-six transactions with 33 available values were identified; they had a total worth of almost \$3.2 billion.

Three major source countries accounted for more than half of the investment transactions in this industry. Japanese investors had the most transactions (12) followed by investors from Germany (11) and Canada (4). The largest investment, however, was made by a Belgian firm, Solvay SA. Solvay America Inc., the Houston-based subsidiary of the Brussels chemical firm, acquired Tenneco Minerals Co. for \$550 million in cash. Tenneco Minerals Co, based in Lakewood, Colorado, produces caustic soda and sodium sulfite and has an 80 percent interest in a Wyoming soda ash joint venture with Japan's Asahi Glass Co. Ltd.

The second largest investment transaction was also an acquisition. Joh. A. Benckiser GmbH, a German consumer products company, purchased the Coty fragrance and cosmetics business from Pfizer Inc. for \$440 million. Benckiser has headquarters in Ludwigshafen and is controlled by the Reimann family.

Acquisitions were the primary mode of investment and accounted for 20 transactions. Investors from Japan and Germany accounted for half of all of the acquisitions; they purchased six firms and four firms respectively. Plant expansions were the second most prevalent form of investment; there were 10 of them.

Three chemical subsectors attracted most of the foreign direct investment. Plastics materials, synthetic resins and nonvulcanizable elastomers (SIC 2821) had 10 transactions; pharmaceutical preparations (SIC 2834) had nine transactions and perfumes, cosmetics, and other toilet preparations (SIC 2844) accounted for seven. These chemical investments were located primarily in four states: New York and Texas had seven transactions each and California and New Jersey had five each.

Primary Metal Industries (SIC 33) -- The number of foreign direct investment transactions in primary metals in 1992 remained at the level of the previous year; the total investment value rose by almost 47 percent,

however. Twenty-one transactions with 11 known values had a total of \$601.7 million. Japan was once again the primary source country for foreign investors in this industry, as has been the case for the last eight years. Japanese investors had nine transactions followed at a distance by German investors with three transactions and investors from the United Kingdom with two transactions.

The largest investment was the \$350 million acquisition of FLS Holdings Inc., the parent company of Tampa-based Florida Steel Corp., by Kyoei Steel Ltd of Japan. Florida Steel is the country's largest maker of concrete-reinforcing steel bars. Kyoei Steel Ltd., based in Hirakata, Japan, is one of that country's largest producers of steel bars. The second largest investment was also an acquisition. BICC Cables Corp., the New York subsidiary of London's BICC PLC, purchased the North American electrical cable operations of Reynolds Metals Co. of Richmond, Virginia for \$77 million and merged them into Cablec Utility Cable Co.

Almost one-third of the investment transactions (nine) were in the steel works, blast furnaces, and rolling mills subsector (SIC 3312). The steel pipes and tubes subsector (SIC 3317), with three transactions, was the second most attractive subsector to investors. Investments were divided evenly among acquisitions, new plants, and joint ventures; there were five transactions in each category, while plant expansions had four transactions. More than one-quarter of the transactions took place in two states; Pennsylvania accounted for four investment transactions, Indiana, for two, and the remaining transactions were widely scattered.

Industrial Machinery and Equipment (SIC 35) -- Foreign direct investment in the industrial machinery and equipment industry totaled \$225 million in 1992, a drop of \$235 million from the \$460 million invested in 1991. The total number of transactions by foreign companies investing in the machinery area decreased 39 percent from 54 in 1991 to 33 in 1992.

Acquisitions were the principal mode of investment with 12 transactions. There were also six transactions each for new plants, plant expansion, and the "other" category, two equity increases and a joint venture.

Japan had the most investments in U.S.-based machinery companies with 19 transactions. Values for 11 of them totaled \$153 million. Japanese investments in this sector continue to be small in size with no transaction exceeding \$100 million.

The computer storage devices (SIC 3572) was the most active subsector with five investment transactions. Japanese investors continued to expand their base in the U.S. computer and office equipment area by making all five transactions in this subsector.

Geographically, most transactions were located in the same four states as in 1991. California had the most with seven transactions, followed by North Carolina with five, and Michigan and Texas with three each.

Electronic and Electric Equipment (SIC 36) -- In an increasingly sluggish economy, foreign investors' activity in the electronic and electric equipment sector declined more than 30 percent in the number of identified transactions and 56 percent in known values. In 1992, 31 transactions were recorded with 12 known values totaling \$1.7 billion, as compared with 45 transactions with 22 values that totaled \$3.9 billion in 1991.

Investors from Japan, Germany, and Canada accounted for 81 percent of the total number of transactions. Japanese companies were the most active foreign investors in the computer market, accounting for 16 transactions totaling \$312 million. Although German investors had only five transactions, they totaled more than 60 percent of the value identified in this industry at \$1.1 billion. There were four investments from Canada.

There were 10 acquisitions, which remained the most favored mode of investment in this industry. Eight new plants, six joint ventures, four "other" transactions, two plant expansions, and one equity increase were also identified.

The largest transaction in electronics was an equity increase by Siemens AG, a German electronics company, in Rolm Systems, a Santa Clara-based switching equipment manufacturer. Siemens acquired the 50 percent owned by IBM Corp. for \$1 billion. Siemens had originally acquired 50 percent of Rolm Systems in 1989 for \$844 million.

For the tenth consecutive year most foreign direct investment transactions in the electronics industry occurred in California. In 1992, eight investments were made in California, followed by four in Illinois, while 13 other states had three or fewer investments.

Transportation Equipment (SIC 37) -- Foreign direct investment in the transportation equipment industry fell

by almost 22 percent in 1992. There were 18 transactions with 12 known values totaling almost \$1.1 billion compared to 23 transactions with 17 values totaling \$1.5 billion in 1991. This year marked the tenth year that Japanese investors were predominant in this industry. They accounted for 10 transactions with eight values that totaled \$544.5 million. German investors were also active investors; there were four transactions with two values that totaled \$490 million.

The two largest investment transactions were made by German and Japanese firms and accounted for almost three-quarters of the total investment in this industry. The first of these, BMW of North America's new \$400 million manufacturing plant in Greer, South Carolina, was made by Bayerische Motoren Werke AG. The Munich-based automobile manufacturer is controlled by the Quandt family. The second largest investment was Auto Alliance International Inc., a joint venture between Mazda Motor Corp. of Japan and the Ford Motor Co. valued at \$380 million. The equally owned joint venture will run an auto assembly plant in Flat Rock, Michigan.

More than three-quarters of the 18 investments were made in two transportation subsectors. Motor parts, vehicle parts and accessories (SIC 3714) had eight investment transactions, six of which had a total value of \$213.5 million. The second subsector -- autos, motor vehicles, and passenger car bodies (SIC 3711) -- had six investment transactions, five of which had a total value of \$825.5 million. Of these 14 investments, six were plant expansions, while there were two investments in each of the acquisitions/mergers, joint ventures, and new plants categories. They took place primarily in Michigan (four), Kentucky (three), Florida (two), and South Carolina (two).

Instruments and Related Products (SIC 38) -- Investment activity by foreigners in the instruments and related products industry decreased 27 percent in the total number of transactions and increased by 36 percent in total value from the previous year. During 1992, 11 transactions were identified with seven known values that totaled \$403.7 million. In 1991, there were 15 transactions with seven known values that totaled \$297 million.

Acquisitions were the favorite mode of investment in the instruments sector. Foreign companies made six acquisitions, three of which had a total value of \$333 million.

The most notable transaction in this sector was the \$250 million acquisition of California-based Shiley Inc.'s cardiovascular line by Fiat SpA of Italy, which is controlled by the Agnelli family.

Insurance Carriers (SIC 63) -- In what amounted to the largest foreign acquisition of 1992, Altus Finance, a financial services holding company 60 percent owned by the French bank Credit Lyonnais SA, purchased the Los Angeles-based Executive Life Insurance Company for \$3.6 billion. The transaction, which involved months of negotiations, accounted for 23.9 percent of the total value of foreign direct investment in the United States for 1992.

Hotels and Other Lodging Places (SIC 70) -- In 1992, foreign direct investment in U.S. hotels and other lodging places amounted to \$290 million compared with \$588 million in 1991, \$3.7 billion for 1990, and \$5.0 billion in 1989. The number of transactions dropped from 50 in 1989, 39 in 1990, and 22 in 1991 to 16 for 1992. The decline is largely the result of the virtual inactivity in this industry by investors from Japan and the United Kingdom.

For 1989 and 1990 investors from Japan (\$4.1 billion) and the United Kingdom (\$2.2 billion) accounted for \$6.4 billion, 74 percent of foreign direct investment in the U.S. hotels and other lodging places sector. In 1992, investment from these sources declined to \$34 million or 12 percent of foreign investment.

Along with the decline of foreign investment by traditional major foreign investors, new investors have emerged from nontraditional sources. For example, in 1992 the largest investments came from the Bahamas, Hong Kong, Taiwan, and Spain. These investments, for the most part, were individually smaller than the earlier investments from Japan and the United Kingdom.

Real Property -- In 1992, the value of foreign direct investment in U.S. commercial real estate continued the downward trend that began in the late 1980's. For 1992, foreigners purchased \$600 million of U.S. commercial real estate, a decline of 62 percent from the \$1.6 billion foreigners purchased in 1991 and 82 percent from \$3.3 billion invested in 1990. There were 28 transactions completed in 1992, compared with 41 in 1991 and 109 for 1990. The recent sharp decline in Japanese investment in U.S. commercial real estate is the leading factor in the

overall decline. Purchases of agricultural land and individual residential real estate units are not included in this report.

For the first time in eight years the Japanese were not the major investors in U.S. real estate. The Germans who invested \$256 million in 1992 were the major foreign investors. Japanese real estate investment declined to \$120 million in 1992 from \$1.5 billion in 1991 and \$2.4 billion in 1990. The Japanese concluded only five U.S. real estate transactions in 1992 compared with 18 in 1991 and 50 for 1990.

In 1992, there were two major commercial real estate transactions of \$100 million or more, both involving German investors. The investments involved the purchase of a vacant Times Square office building by Bertelsmann AG (owned by Reinhard Mohn) from Citicorp for \$119 million and the purchase of the Carillon office building in Charlotte, North Carolina by Hesta AG for \$100 million.

The outlook for foreign direct investment in U.S. commercial real estate is for continued limited activity. Although the current U.S. commercial real estate market is depressed and bargains exist, most current foreign interest is being generated by Europeans and South Americans. Any significant increase in foreign investment activity will probably not occur until vacancy rates of existing capacity decline and/or profitability prospects increase.

TABLE ABBREVIATIONS

DESCRIPTION OF KEY TERMS

Acquisition -- a transaction in which title to stock or assets of the U.S. entity is secured by another person or enterprise. The substantive result is that one party obtains ownership of another.

Agency -- foreign financial intermediary operating in the United States primarily financing international transactions, but prohibited from accepting domestic deposits.

Branch -- foreign financial intermediary (integral part of the foreign parent bank) which can accept domestic deposits.

Development -- realty investment that involves construction (as opposed to purchase).

Equity Increase -- a gain in the percentage of equity securities held, or an equivalent gain in the percentage of ownership, by a foreign investor.

Foreign Direct Investment -- the direct or indirect ownership by a single foreign person, company, or affiliated group of persons or companies of 10 percent or more of the voting securities of an incorporated business enterprise, or an equivalent interest in an unincorporated business enterprise, or a 10 percent or more interest in real property.

Joint Venture -- a transaction in which two or more parties establish a new business enterprise to which each contributes, and in which ownership and control is shared.

Merger -- a transaction which results in the dissolution of the acquired business enterprise, into either another already existing or into a reorganized (but not always renamed) company.

New Plant -- a new operating facility, established either in conjunction with an existing foreign-owned productive enterprise or as a completely new venture.

Other -- when used as a classification of investment type, this category includes, but is not limited to, new companies, headquarters, subsidiaries, branches, agencies, representative offices, stores, outlets, warehouses, and unidentified transactions.

Plant Expansion -- an addition to the production capacity of an existing foreign-owned operating facility.

Purchase -- used herein to describe realty transactions, specifically the acquisition of real property.

Real Estate -- real property, excluding agricultural land and individual residential units for personal use.

Standard Industrial Classification (SIC) -- categorizes U.S. industries in a numerical classification series, in accordance with the composition and structure of the domestic economy.

Subsidiary -- separate legal entity either owned or controlled by foreign investors but permitted to do business in the United States under state and/or federal authority.

Transaction Value -- the reported total cost of the investment or the estimated proportion of the investment if a joint venture, regardless of the source or timing of funds.
